### **Excercise-1.2**

Some characterstics of intelligence are:

1. Intelligence means all-round mental efficiency.
  - All round mental efficiency means that it includes whole general set of abstract thinking and reasoning powers.
2. Intelligence is the ability of adaptation and adjusting to a new situation.
  - It means ability of recombining our behaviour patterns so as to act better in a novel situation.
3. Intelligence is capacity to learn from past experience.
4. Intelligence also means the ability to tackle social and emotional problems
